

ActionListener

```
graph BT; RB[RedBlackTreeView.Operation] --> AL[ActionListener];
```

A UML class diagram showing a relationship between two classes. The class 'ActionListener' is represented by a white box with a black border at the top. The class 'RedBlackTreeView.Operation' is represented by a gray box with a black border at the bottom. A solid blue arrow points from the bottom of the 'RedBlackTreeView.Operation' box to the bottom of the 'ActionListener' box, indicating that 'RedBlackTreeView.Operation' implements the 'ActionListener' interface.

RedBlackTreeView.Operation
